THE MENTAL HYGIENE PROGRAM OF CIVILIAN PUBLIC SERVICE

.....That we who have been assigned to work in mental hospitals and training schools for mental deficient apprise ourselves of the service that we may render; that we may better perform that service by an exchange of knowledge regarding our mutual concerns; and that we as a united group may leave behind us when we return to private pursuits a contribution to the field of mental hygiene that will be concrete and enduring.....these shall be the objectives.

.....That we who are sane and literate may speak for our afflicted brothers and present to society the story they cannot tell, in the hopes that some day they will be understood and rendered treatment that is just and adequate.....this shall be the incentive.

.....That we who seek in this destructive period the opportunity to contribute constructively to a war-torn world may fulfill that desire in the philosophy of love and understanding.....this shall be the source and guiding power of motivation.
